

Code With Mistake Comments

```
print("Countdown Program")
num = int(input("Enter starting number: "))
sum_total = 0

while num >= 0:
print("Number:", num) # Error: No indentation inside while
sum_total = sum_total + num # Error: No indentation

if num % 2 == 0: # Error: This if should be inside while
print("Even") # Error: No indentation
else:
print("Odd") # Error: No indentation

num = num - 1 # Error: Should be inside while loop
print("Total sum:", sum_total)

if sum_total > 100 # Error: Missing colon :
print("Big total") # Error: No indentation
else:
print("Small total") # Error: No indentation
```

Mistakes Explanation

- **No indentation inside while loop**
 - All statements inside while must be indented.
- **Wrong position of if condition**
 - if num % 2 == 0: should be inside the while loop.
- **No indentation inside if-else**
 - print("Even") and print("Odd") must be indented.
- **Wrong position of num = num - 1**
 - It must be inside the while loop.
- **Missing colon in final if**
 - if sum_total > 100 must end with :
- **No indentation in final if-else block**

Correct Code

```
print("Countdown Program")

num = int(input("Enter starting number: "))
sum_total = 0

while num >= 0:
    print("Number:", num)
    sum_total = sum_total + num

    if num % 2 == 0:
        print("Even")
    else:
        print("Odd")

    num = num - 1

print("Total sum:", sum_total)

if sum_total > 100:
    print("Big total")
else:
    print("Small total")
```

A screenshot of a terminal window showing the execution of a Python script. The window title is 'Run' with a sub-tab 'am1'. The command line shows the path to the Python interpreter and the script file. The output of the script is displayed in the terminal, showing the countdown from 5 to 0, the parity of each number (Odd/Even), the total sum (15), and a message indicating the total is small. The process finished with exit code 0.

```
Run am1
C:\Users\Shubham\PycharmProjects\new\.venv\Scripts\python.exe C:\Users\Shubham\PycharmPro
Countdown Program
Enter starting number: 5
Number: 5
Odd
Number: 4
Even
Number: 3
Odd
Number: 2
Even
Number: 1
Odd
Number: 0
Even
Total sum: 15
Small total
Process finished with exit code 0
```
